The Complete Hospital Operating System

ENTERPRISE

HIMS + HRMS + Finance (SAP-equivalent) — powered by 7 AI Intelligence Layers for hospital leadership.

HRMS Staff & Payroll ↔ **ADRINE AI** 7 Intelligence Layers ↔ **HIMS** Clinical Ops ↔ **FINANCE** SAP-equivalent

1 HIMS — HOSPITAL INFORMATION MANAGEMENT

Patient & OPD

- **30-sec Registration** + UHID
- ABHA/ABDM Integration
- Patient 360° Timeline
- Emergency Rapid Registration
- OPD Queue & Token Display

Doctor Module

- Smart OPD Dashboard
- Digital Rx (Keyboard/Voice/Pencil)
- AI Voice Scribe
- Lab & Radiology Orders
- IPD Round Management

IPD & Nursing

- Bed & Ward Management
- Vitals & MAR Tracking
- Shift Handover Notes
- Discharge Summaries
- Day Care & Dialysis

Laboratory

- Order to Result Workflow
- Barcode Sample Tracking
- Auto-Approval for Normals
- Critical Value Alerts
- External Lab Management

Radiology

- Modality Worklists
- Technician & Radiologist Flow
- Template-based Reporting
- PACS Integration Ready
- Critical Findings Escalation

Pharmacy & Inventory

- Prescription Queue
- Drug Interaction Checks
- Stock & Batch Tracking
- Expiry Management
- Auto Stock Deduction

2 HRMS — HUMAN RESOURCE MANAGEMENT

Employee

- Digital Records
- Dept Hierarchy
- Role & Permission
- Onboarding/Exit

Attendance

- Biometric Integration
- Shift & Roster
- Overtime Tracking
- Leave Management

Payroll

- Auto Calculation
- PF / ESI / TDS
- Loan & Advance
- Bank File Export

Performance

- Appraisal Cycles
- 360° Feedback
- Training Records
- Skill Matrix

3 FINANCE / ERP — SAP-EQUIVALENT

Billing

- OP & IP Billing
- Package Pricing
- Discount Workflow
- Corporate Billing

Accounts

- General Ledger
- AP / AR
- Bank Recon
- Tally Integration

TPA/Insurance

- Pre-Auth Workflow
- Claim Tracking
- Query Management
- Settlement Recon

Procurement

- Purchase Orders
- GRN & QC
- Vendor Master
- Multi-Location

💰 1. FINANCIAL INTELLIGENCE — CFO's Best Friend LAYER 1

Feature	What It Does	Business Value
Revenue Leakage Detection	AI scans all bills, finds unbilled services, missed charges, under-billed procedures	Recovers 3-8% of lost revenue monthly
Cash Flow Forecasting	Predicts cash position for next 30/60/90 days based on collections, payables, TPA timelines	No surprise cash crunches
Discount Abuse Detection	Flags unusual discount patterns by staff/doctor	Stops unauthorized revenue loss
Department Profitability	AI calculates true P&L per department (including hidden costs like shared resources)	Know which dept to invest vs shut down
Vendor Price Intelligence	Compares your purchase prices with market benchmarks	Negotiate better with suppliers
TPA/Insurance Delay Prediction	Predicts which claims will get delayed/rejected based on historical patterns	Prioritize follow-ups, reduce aging
Daily Financial Digest	Every morning, CFO gets AI-written summary of yesterday's financial performance	No need to dig through reports

👥 2. WORKFORCE INTELLIGENCE — HRMS AI LAYER 2

Feature	What It Does	Business Value
Attendance Anomaly Detection	Flags unusual patterns: late arrivals, buddy punching, excessive leaves	Reduces payroll fraud
Shift Optimization	AI suggests optimal nurse/staff schedules based on predicted patient load	Reduce overtime costs
Attrition Risk Prediction	Identifies employees likely to resign (based on attendance, leave patterns, tenure)	Retain key staff before they leave
Training Gap Analysis	Matches staff skills vs required certifications, flags gaps	Compliance + Quality
Performance Scoring	Auto-scores staff based on tasks completed, patient feedback, attendance	Fair appraisals
Payroll Anomaly Detection	Flags unusual salary disbursements, ghost employees	Stops payroll fraud
Workload Distribution	Shows which nurses/staff are overloaded vs underutilized	Balance workloads fairly

⚙️ 3. OPERATIONS INTELLIGENCE — COO's Dashboard LAYER 3

Feature	What It Does	Business Value
OPD Load Prediction	Predicts tomorrow's/next week's OPD footfall by department	Staff planning, reduce wait times
Bed Occupancy Forecasting	Predicts bed availability for next 7 days	Emergency bed allocation, no overbooking
Emergency Surge Alerts	Detects unusual ER patterns (accident cluster, epidemic onset)	Prepare staff before chaos
Average Wait Time Analytics	Shows bottlenecks: "Cardiology OPD avg wait = 45 mins (was 20 mins last month)"	Fix patient experience
Discharge Delay Analysis	Identifies why discharges are slow (billing delay? doctor sign-off? pharmacy?)	Faster bed turnover
Equipment Utilization	Tracks CT/MRI/X-Ray machine usage. Flags underutilization or overload	Optimize capital investments
Supply Chain Prediction	Predicts stock-outs before they happen. "Paracetamol will run out in 3 days"	No emergency purchases

📈 4. STRATEGIC INTELLIGENCE — CEO's War Room LAYER 4

Feature	What It Does	Business Value
Catchment Area Mapping	Geographic heatmap: Where do patients come from? Which areas are underserved?	Marketing focus, satellite clinic
Competitor Benchmarking	Compare your prices, services, ratings with nearby hospitals	Strategic pricing
Service Line Opportunity	AI suggests: "You're referring 40 dialysis patients/month out. Start dialysis unit."	New revenue streams
Doctor Performance	Revenue, patient volume, avg consultation time, patient ratings per doctor	Identify stars & underperformers
Patient Retention Analysis	Which patients didn't return for follow-up? Why?	Increase repeat visits
Referral Network Analysis	Which doctors/clinics refer most patients? Which relationships declining?	Protect referral sources
Seasonal Trend Analysis	"Dengue cases spike in August. Flu in December. Plan inventory & staffing."	Proactive planning

🔄 5. REVENUE CYCLE INTELLIGENCE — Billing/Finance LAYER 5

Feature	What It Does	Business Value
Real-time Collection Dashboard	Live: "Today's collection: ₹8.2L. Target: ₹10L. Gap: ₹1.8L"	Immediate visibility
Outstanding Aging Analysis	AI prioritizes which dues to chase first (high amount + low risk)	Faster recovery
Pre-Auth Approval Prediction	Before admission, predicts TPA approval probability	Avoid claim rejections
Billing Error Detection	Flags duplicate charges, wrong codes, missing items	Clean bills = faster payment
Package Leakage Detection	"Package was ₹50K but consumables used were worth ₹62K"	Identify loss-making packages

🏥 6. CLINICAL INTELLIGENCE — Quality + Safety LAYER 6

Feature	What It Does	Business Value
Clinical Outcome Tracking	Readmission rates, infection rates, mortality by department	Quality accreditation (NABH)
Drug Interaction Alerts	AI checks prescriptions for dangerous combinations	Patient safety
Critical Value Escalation	Abnormal lab results immediately pushed to doctor's phone	Saves lives
Antibiotic Stewardship	Flags overuse of high-end antibiotics	Reduce AMR, reduce costs
Length of Stay Prediction	Predicts how long a patient will stay (for bed planning)	Capacity management

📦 7. PROCUREMENT INTELLIGENCE — SAP-like LAYER 7

Feature	What It Does	Business Value
Auto-Reorder Suggestions	"Stock of Ceftriaxone is at 20%. Suggested PO: 500 units"	No stockouts
Expiry Risk Dashboard	Items expiring in 30/60/90 days. Prioritize usage.	Reduce wastage
Consumption Anomaly	"OT consumed 3x surgical gloves this week. Investigate."	Catch pilferage
Vendor Performance Scoring	On-time delivery %, quality issues, price competitiveness	Better vendor selection
Cost Per Patient Analysis	Average consumable cost per surgery type	Price procedures correctly

⭐ AI COMMAND CENTER — MORNING BRIEFING

```
ADRINE AI COMMAND CENTER — Good Morning, Mr. Giridher
──────────────────────────────────────────────────────────────────────
TODAY'S PULSE
💰 Collection: ₹14.2L (▲ 12%)   🛏️ Bed Occupancy: 82%   👥 Staff Present: 94%   📈 OPD Forecast: 420 pts

🚨 ACTION REQUIRED
• Revenue Leak: ₹28,000 unbilled radiology detected • Stock Alert: Sutures run out in 2 days
• HR Alert: Nurse Lakshmi - 5th late arrival • Claims: 4 pending >30 days (₹3.8L)

💡 AI INSIGHTS
• Ortho OPD wait ↑35%. Add afternoon slot. • 58% T.Nagar patients = Cardiology. Marketing focus?
```

WHY ADRINE ENTERPRISE

Single Unified Platform

- No more juggling HIMS, HRMS, and Tally separately
- One login for all hospital operations
- Real-time data sync across all departments
- Single vendor accountability — no blame games

AI-First Architecture

- Intelligence built-in, not bolted-on later
- Proactive alerts instead of just reports
- Learns from your hospital's unique patterns
- Continuously improving recommendations

IN Built for Indian Healthcare

- ABHA / ABDM / PMJAY compliance ready
- GST, PF, ESI statutory compliance built-in
- Tally integration for existing accounting
- Multi-language support (English, Hindi, Tamil)

Enterprise Security

- Role-based access control (RBAC)
- Complete audit trails for every action
- Data encrypted at rest & in transit
- On-premise or cloud deployment options

EXPECTED BUSINESS IMPACT

3-8%	20%	50%	100%
Revenue Recovery from Leakage	Reduction in Overtime Costs	Faster Billing & Discharge	Real-time Visibility

COMPLETE MODULE SUMMARY

HIMS Modules

- ✓ Patient Registration
- ✓ OPD Queue & Display
- ✓ Doctor Consultation
- ✓ AI Voice Scribe
- ✓ IPD & Bed Management
- ✓ Nursing & Vitals
- ✓ Laboratory
- ✓ Radiology
- ✓ Pharmacy
- ✓ Billing (OP + IP)

HRMS Modules

- ✓ Employee Records
- ✓ Attendance & Biometric
- ✓ Shift & Roster
- ✓ Leave Management
- ✓ Payroll Processing
- ✓ PF / ESI / TDS
- ✓ Performance Appraisal
- ✓ Training & Skills

Finance/ERP Modules

- ✓ General Ledger
- ✓ Accounts Payable
- ✓ Accounts Receivable
- ✓ TPA & Insurance
- ✓ Procurement
- ✓ Inventory
- ✓ Expense Management
- ✓ Budgeting
